

**Attention- Patients with a deductible and/or co insurance:**

Your insurance benefits for physical therapy apply towards your deductible and/or out of pocket maximum. In order to prevent large balances at the end of your treatment, we recommend that you make a pre-payment towards your co-insurance or deductible. The amount that is applied to your deductible and/or out of pocket max are based on the insurance companies allowed amounts for each specific service that you receive during your treatment. We will not know the exact amount that you will be responsible for until your claims process, but we base the suggested amounts on previous instances.

**Suggestions:**

Deductible of \$100 or higher- \$50 per day

10% co insurance- \$10 per day

20% co insurance- \$20 per day

*\*The amounts listed above are only an estimation and may or may not be enough to cover the entire balance. These are our suggestions based on previous instances. It is important to understand that if the amount paid at the time of visit is lower than the amount that your insurance applies as patient responsibility, you will still receive a bill for the difference. \**

**Again- it is not mandatory to pay at the time of the visit, but ultimately, you will be receiving a bill on a monthly basis as your claims process. This is merely a suggestion so that you do not have to pay your full balance all at once.**
